Safety Locking Device :

The Safety locking device provides additional security when the lift is at rest.

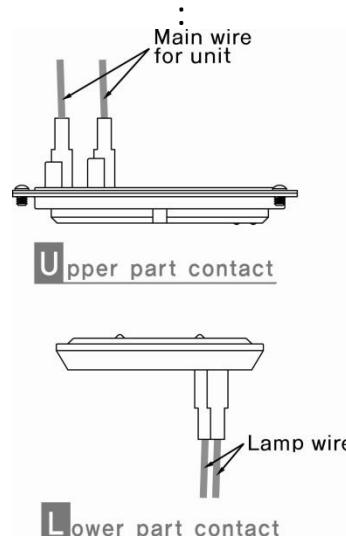

Special safety locking jaws engage to take the load off the suspension cables.

The jaws remain locked even in the event of a power failure and only disengage when the lift is operated.

Electrical Contact Plates

Electrical contact is made by way of spring loaded contacts plates within the main unit and fixed contacts in the lowering coupler of the lift.

Upon lowering the lift the internal relay isolates the electrical supply, once in the raised position the relay returns power to the lower contacts

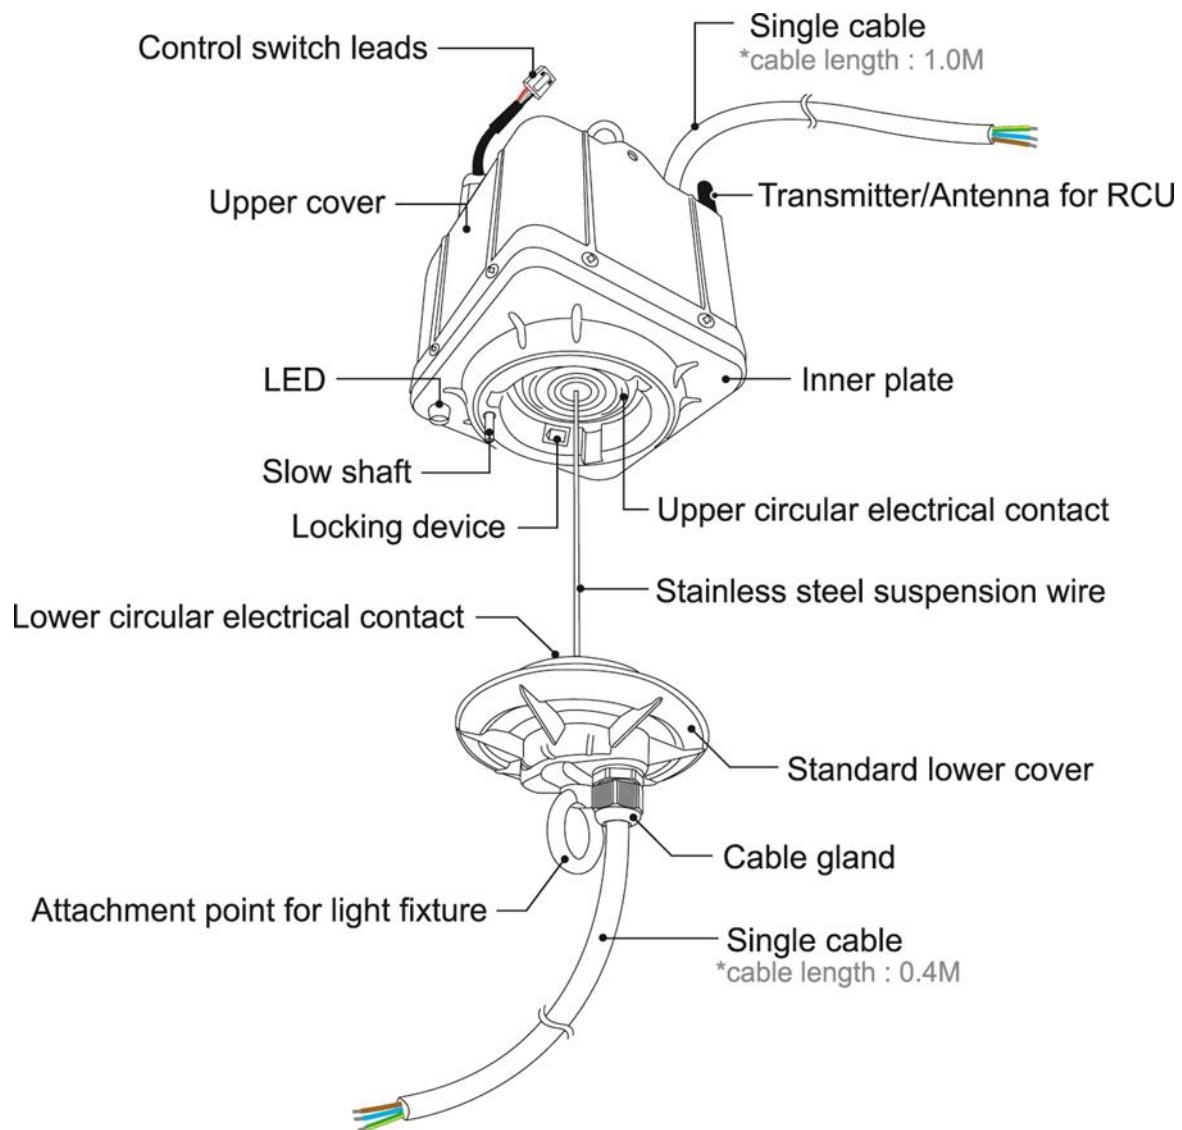

Standard mounting option :

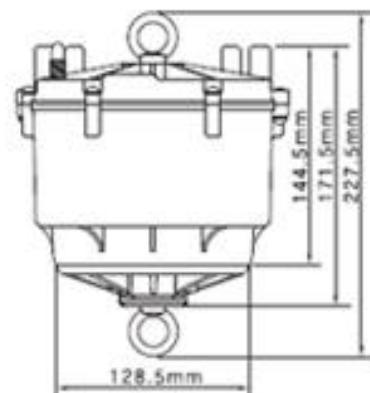

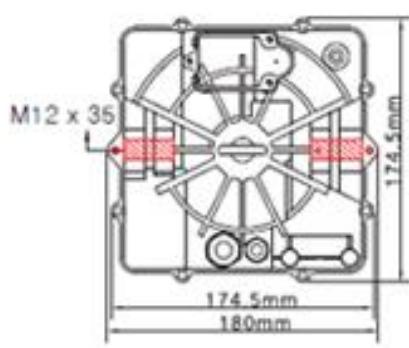

NB* Secondary fixing point or tether maybe required, If in doubt please consult a structural engineer for advise
